CONTENTS

The surface velocity field in steep and breaking waves. W. K. Melville and Ronald J. Rapp *page* 1

Vorticity generation by shock propagation through bubbles in a gas. J. M. Picone and J. P. Boris 23

Three-dimensional instability of a plane free shear layer: an experimental study of the formation and evolution of streamwise vortices. J. C. Lasheras and H. Choi 53

Three-dimensional shear layers via vortex dynamics. W. T. Ashurst and Eckart Meiburg 87

The long-wave instability of a defect in a uniform parallel shear. J. Lerner and E. Knobloch 117

Development of the turbulent near wake of a tapered thick flat plate. A. Haji-Haidari and C. R. Smith 135

Numerical models and experiments on immiscible displacements in porous media. Roland Lenormand, Eric Touboul and Cesar Zarcone 165

Turbulence structure near a sharp density interface. Imad A. Hannoun, Harindra J. S. Fernando and E. John List 189

Turbulent mixing at a shear-free density interface. Imad A. Hannoun and E. John List 211

A note on the divergence effect and the Lagrangian-mean surface elevation in periodic water waves. M. E. McIntyre 235

Effect of vortex shedding on the coupled roll response of bodies in waves. M. J. Downie, P. W. Bearman and J. M. R. Graham 243

The onset of convection and turbulence in rectangular layers of normal liquid ^{4}He. R. W. Motsay, K. E. Anderson and R. P. Behringer 263

Guided surface waves near cutoff. John Miles 287

A simple example from flat-ship theory. Susan Cole 301

Particle size segregation in inclined chute flow of dry cohesionless granular solids. S. B. Savage and C. K. K. Lun 311

Linear stability of a non-symmetric, inviscid, Kármán street of small uniform vortices. Javier Jiménez 337

Characteristics of vorticity fluctuations in a turbulent wake. R. A. Antonia, L. W. B. Browne and D. A. Shah 349

Instability of swirl in low-Prandtl-number thermal convection. Josep M. Massaguer and Isabel Mercader 367

Viscous oscillations of a supported drop in an immiscible fluid. M. Strani and F. Sabetta 397

Deep-water plunging breakers: a comparison between potential theory and experiments. Douglas G. Dommermuth, Dick K. P. Yue, W. M. Linn, R. J. Rapp, E. S. Chan and W. K. Melville 423

The energy and action of small waves riding on large waves. Frank S. Henyey, Dennis B. Creamer, Kristian B. Dysthe, Roy L. Schult and Jon A. Wright 443

The unsteady force on a body at low Reynolds number; the axisymmetric motion of a spheroid. C. J. Lawrence and S. Weinbaum 463

The stability of stationary waves in a wavy-walled channel. John Philip McHugh 491

On the thermodynamic stability of steady-state adiabatic systems. L. F. Henderson 509

The structure of turbulent shear-induced countercurrent flow. Ioannis K. Tsanis and Hans J. Leutheusser 531

Electrically driven vortices in a strong magnetic field. Joël Sommeria 553

Differential mixing in a stratified fluid. T. Maxworthy and S. G. Monismith 571

Corrigendum 599
